

Connect Club Visioning to the Rotary Action Plan!

How Clubs Can Bring Rotary's **Action Plan** to Life

Rotary International wants all Rotary clubs to develop an Action Plan for the next three years.

Get help from Club Visioning (CV) to develop this plan.

Club Visioning is the program that offers the support that the Rotary club may need for this work. Club Visioning offers technology and methodology to develop which ideas the club should invest in for the next three years. Club Visioning offers the club to develop an Action Plan that offers continuity, consensus and consistency over the three years.

Through CV, the members develop goals and actions for the three upcoming years and where they want the club to be in 3 years. This development work is facilitated by certified facilitators that the district provides.

Club Visioning increases the activity and commitment in the club and not least – you have fun!

CV can be completed on-site or online. In terms of time, the CV itself includes two meetings of about 2.5 hours each. In addition, there is a pre-meeting. The actual implementation of all plans/activities for the club is then added.

A club president thought: "It feels really good and I feel that the commitment in our club has increased significantly since we worked through Club Visioning, now we know where we are going and everyone is pulling in the same direction."
